

A decorative vertical line on the left side of the slide, with a solid black bar at the top and bottom. A horizontal dotted line is positioned near the top of the slide.

Crossmodal processing

Week 3

Grete Liis Reimand
au763212@uni.au.dk

Agenda

- Group discussions
- Crossmodal processing experiment
- (quick github how-to)
- Data analysis

Group discussions

Crossmodal congruences

Think of some examples for:

- a) statistical
- b) structural
- c) semantic

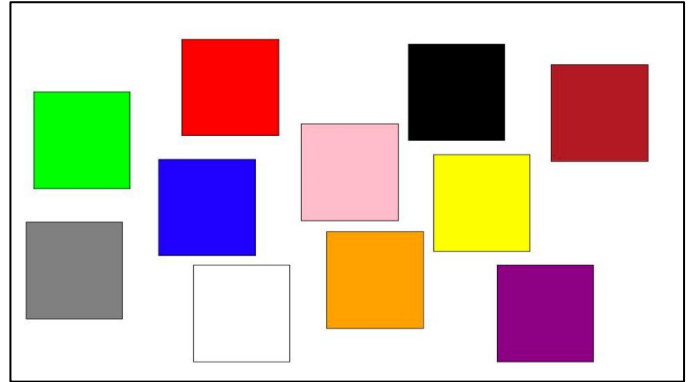

crossmodal congruences

Crossmodal congruency

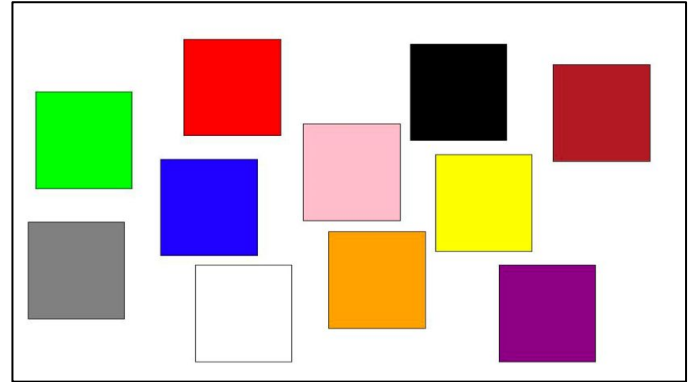

On your own first, pick one of the colors that you think fits best for each of these basic tastes: “bitter”, “salty”, “sour”, “sweet”

Then discuss in your group how your choices overlap/differ

Crossmodal congruency

For some of those colors, find a particular food where the taste (not the color!) matches this color and discuss in the group why you think so. Are there food items that match in taste but not in their original color?

Crossmodal congruency

How could this association between taste and color be tested empirically? Think esp. about a crossmodal congruency task and how that would be set up

Synesthesia

Think of reasons why synesthesia research is sometimes regarded as “unscientific”

Synesthesia

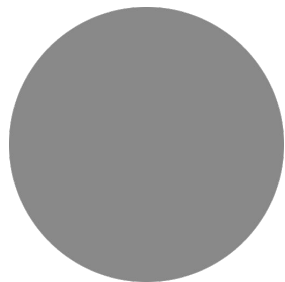

Come up with a way to test for the presence of particular synesthesia effects, e.g. grapheme-color synesthesia.

Grapheme-colour synesthesia refers to letters or numerals being associated with the experience of colours

Crossmodal congruency experiment

Congruent

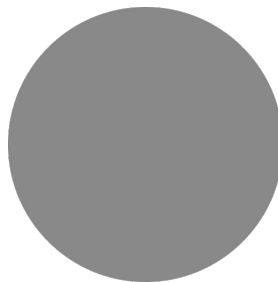

low pitch

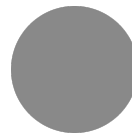

high pitch

Incongruent

high pitch

low pitch

Crossmodal congruency experiment

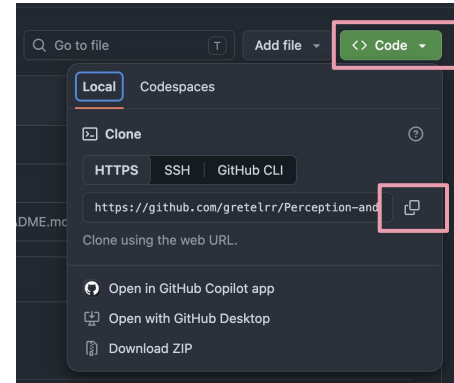

There's data, exercises, and solutions in GitHub

Quick GitHub “how-to” (all done in the terminal)

```
cd [folder-you-want-to-have-the-git-folder-in path]
git clone [repo link]
```

```
cd [git-folder-path]
git pull origin main
```

Sometimes doesn't work on eduroam : DDD Then try hotspot or downloading stuff manually (or again at home on good wifi)

Wrapping up

Spend 5 minutes at your table coming up with any experiment ideas and add them to the brainstorm docs

See you next week!
